Director of IT / Senior Software Engineer with 8+ years' experience across SaaS platforms, automation, and large-scale event IT infrastructure. Known for translating messy real-world constraints into reliable systems, and for leading technical teams in high-pressure, high-visibility environments.

Experience

Software Engineer — Campaign Monitor (Marigold)

Apr 2021 – Present

- Delivered features across multiple product domains within the Campaign Monitor platform, contributing to both frontend user workflows and backend services in a large-scale email marketing system.
- Rotated across several engineering teams, building deep institutional knowledge of platform architecture and enabling rapid contribution across systems.
- JavaScript Crew member reviewing all JS code merges, maintaining shared libraries and build tools, and setting frontend standards across the entire engineering organization.
- Designed and implemented event-driven backend services and queue-based processing pipelines, improving reliability and scalability of asynchronous workflows.
- Led development of complex product features requiring coordination across frontend, APIs, and backend services, ensuring consistent behaviour across distributed components.
- Contributed to system design and architectural discussions for new features, balancing delivery speed with long-term maintainability.
- Maintained and extended legacy systems while incrementally modernizing components to align with current engineering standards.
- Partnered with product and engineering teams to break down large initiatives into implementable technical milestones.
- Owned delivery and maintenance of several platform components, supporting ongoing reliability and feature expansion.

Tech: C#, JavaScript/TypeScript, Kafka, gRPC, MSSQL, Terraform.

Associate Software Developer — WiseTech Global

May 2019 – Mar 2021

- Solely responsible for overseeing and implementation of the AIS ship tracking system (React, TypeScript, Google Maps), delivering real-time cargo visibility to all CargoWise customers.
- Maintained and extended the MAWB automation system, ingesting air-cargo data from airlines and carriers to deliver near real-time cargo visibility to all CargoWise customers. (C#, MSSQL)
- Delivered UI enhancements to the PAVE platform - WiseTech's in-house task management platform, improving usability for internal operations teams. (C#, MSSQL)

Tech: C#, MSSQL, React, JavaScript/TypeScript

Software Engineer — EdApp LMS (Formerly Creative Licence Digital)

Feb 2018 – May 2019

- Built peer-authoring templates and mobile features across React Native, Backbone.js, and Cordova.
- Implemented logging and audit trails for the push-notification system.
- Participated in 24/7 on-call support, CI/CD pipelines, and automated testing.

Tech: CoffeeScript/JavaScript, MongoDB, React, C#, PostgreSQL, Jenkins, React Native.

Volunteering Experience

Director of IT — Sydney Manga and Anime Show (SMASH!) Inc.
Nov 2025 – Present

- Lead IT across Engineering, Systems, and Support, overseeing 35 volunteers / 3 leads for one of Australia's largest pop-culture conventions.
- Partner with the Board and Executive to set IT strategy aligned with growth, risk, and live-event constraints.
- Accountable for ticketing, access control, networking, and on-site incident response for 45,000+ attendees.
- Leading development of a multi-year IT strategy and roadmap to monitor costs, scale infrastructure, internal systems, and volunteer engineering operations for a large volunteer-run convention.

Assistant IT Director — SMASH! Inc.
Jan 2020 – Nov 2025

- Coordinated cross-team delivery between IT, Ticketing, and Operations, managing ticket allocations for all exhibitors and guest performers.
- Planned work, delegated tasks, and reviewed output for a team of engineers building and maintaining event systems.
- Successfully delivered 5 consecutive conventions with zero critical IT failures.
- Took ownership of team operations and morale ("vibe officer"), organising meetups, managing reimbursements, and improving volunteer engagement.

Software Developer — SMASH! Inc.
Nov 2018 – Jan 2020

- Designed and built an integrated ticketing and mobile scanning system, supporting 40,000+ attendees and vendors in a team of 5 (we started from 5 humble yet passionate engineers).
- Managed on-site technical setup and live operations under peak load.

Education

Bachelor of Science (Computer Science) — University of New South Wales — 2014 – 2017

Extras

Talk: **Preparing IT Infrastructure for an Anime Convention**

Engineering-wide company retreat presentation covering DevOps, hardware, software, and personnel challenges behind running a major live event.
Jun 2025 · https://www.youtube.com/watch?v=bBZFJ9uXrbU

Technical Skills

Languages: JavaScript, TypeScript, C#, Java
Databases: MSSQL, MySQL, PostgreSQL, Redis
DevOps / Cloud: AWS, Azure, Terraform, TeamCity
CI/CD & Tooling: GitHub Actions, TeamCity, Git, Jira
Frameworks: React, .NET, Express.js, Jest, NUnit
